

IT Director

An IT Director is responsible for the management, strategy and execution of IT infrastructure within an organization. Specialising in overseeing technical projects to help deliver the aims and objectives of the business and directing the effective delivery of all aspects of technical development including: networks, systems, disaster recovery and business continuity plans, security and compliance.

The IT Director provides the link between your business growth plans and the technology you need to deliver them. We will oversee the use of technology within your business and plan its development and implementation to ensure you maximise your investment.

The technology roadmap will include all business processes and functions and help you plan for any regulatory and compliance needs and develop a security strategy to protect your business.

- Prepare an IT Strategy in line with the business plan
- Highlight potential projects and priorities
- Identify and recommend the use of new technology solutions

We aim to improve efficiencies and compliance through the effective use of technology and ensure your business stays ahead of your competitors. By focussing on your business needs, managing and controlling your IT Budgets and suppliers and protecting your business we aim to give you confidence in the systems to deliver your business strategy for you.

Contact us to find out how an effective IT Strategy can help drive your business.
