

Project Manager

A project manager is a key role in the delivery of business improvements and is the person who has the overall responsibility for the successful initiation, planning, design, execution, monitoring, controlling and closing a project. They manage all tasks and deadlines, communication and reporting on progress and risks to all concerned.

We help our clients when they have a business improvement program and want an independent, qualified Project Manager to ensure the project runs to time and budget. With no distractions internal staff may have doing their day jobs our Project Managers ensure you have:

- No drain on internal resource
- Full accountability of suppliers and staff
- Confidence to commit to business improvements

Using Prince2 methodologies we provide a clear view of all project tasks, offering a completely independent approach to ensure projects are completed allowing you to focus on running your business.

iclaritate can manage all manner of projects, not just those which are technology related. We will provide the most suitable Project Manager for each job and ensure that they are the best fit for you. iclaritate can deliver your project from inception or can help recover your project should it become stuck or running behind schedule.

Contact us to find out how your business can benefit from our Project Managers.
